# Lab Tests Online

Lab Tests Online is an information resource developed to help patients and care givers better understand the laboratory tests used to diagnose, monitor, screen, manage and assess predispositions to diseases. The award-winning platform is created by American Association for Clinical Chemistry and developed globally in partnership with European Diagnostic Manufacturers Association and scientific societies.

## Lab Tests Online

Lab Tests Online has become a valuable tool for patients to learn about laboratory tests and promotion of health literacy in the context of laboratory testing.

### PATIENT-CENTRED

Easy-to-understand independent resource to facilitate understanding of testing procedures to advance doctor-patient dialogue.

### PEER-REVIEWED

Content is written and reviewed by laboratory experts ensuring the information is of the highest quality and based on the health and safety guidelines of each respective country.

### MULTIPLE LANGUAGES

With 17 versions of the site online, including, Chinese, Spanish and French, almost one-third of the world's population can now learn in their national language.
