

## The AI Act – Building trust in EU innovation

10 October 2023 | 15:30 – 17:30 CET

European Parliament (Room: Spinelli 1E2) and Online

Co-hosted by MEP Svenja Hahn, MEP Sergey Lagodinsky,  
MEP Eva Maydell, MEP Petar Vitanov

The AI Act comes at a time of increasing technological changes and opportunities. With the goal of upholding Europe's technological prominence and providing citizens access to groundbreaking applications, the European Commission aims to create a balance between fostering and preserving innovation and enhancing people's trust in human-centric AI solutions. This balance depends on the collaboration of all relevant stakeholders and the exchange of best practices to establish an effective regulatory framework for AI technologies and their oversight in Europe.

The event seeks to serve as a platform of exchange on these priority areas and discuss how AI systems should be handled in Europe.

### Draft agenda

- |                      |   |
|----------------------|---|
